

INT-SP2000 INTERCOM SPEAKER STATION

The INT -SP2000 intercom speaker station includes a push-to-call button and a two-way speaker. Once the call is established, voice communication is hands free. The INT-SP2000 can be mounted out doors if it is in a covered area such as an awning or stoop. Otherwise it should be mounted in a weather resistant box with a hinged lid. If an intercom station is needed in a vestibule that is enclosed by two sets of doors, use the INT-GTEL-WALL-ND phone hand set. The INT -SP2000 may be flush mounted in a double gang back box or it may be surface mounted in a plastic double gang back box.
