

TTS-01 TABLE TOP EMERGENCY CALL SWITCH

The TTS-01 wireless emergency call switch is shown here with custom printing. The pushbutton switch latches in the alarm position when it is pushed and displays an orange alarm status indicator in the top of the button. When the care giver pushes the button again, the orange indicator disappears and the switch initiates a restoral transmission.

TTS-01 Specifications:

Size: 4" W x 2"H x 3"D
